TECHNICAL COLLEGE
Knowledge That Works

FABICK CAT

HANDS-ON LEARNING

Fabick Cat, the Caterpillar® dealer for Wisconsin, Upper Michigan, major portions of Illinois & Missouri and Fox Valley Technical College (FVTC) have established FABTECH, a Service Technician Education Center on the FVTC Spanbauer campus in Oshkosh, WI. FABTECH offers two Caterpillar specific service technician career tracks that focus on developing Caterpillar construction equipment, electric power generation and marine engine service technicians. Students receive a Technical

Diploma and can apply the credits earned toward an Associates of Applied Science degree in Construction Equipment Technology or Electric Power Generation and Marine Engine Technology.

These are affordably priced, accredited programs that provide students with opportunities to be on-the-job and earning a good income at one of Fabick's 37 locations in 12 months. In addition to substantial financial support, Fabick Cat brings the capabilities of

its entire organization as well as the assistance of our partners to this innovative new technical college program. Students are trained by experienced FVTC instructors and have the opportunity to work on current model Caterpillar equipment, engines, generators and switchgear using the latest tools and advanced diagnostic technology.

FABTECH PROGRAMS

Construction Equipment | Electric Power Generation/Marine Engine

Construction Equipment Service Technician

Construction Equipment Service Technicians rely on their training and experience to maintain and perform repairs on Caterpillar compact and heavy equipment that is used in industries such as agriculture, building construction, mining, forestry and road building. Construction Equipment Service Technicians receive training in basic and advanced courses in electrical, hydraulic, and fuel systems. In addition, they focus on the Caterpillar engines that power this

equipment. They complete courses in preventative maintenance, engine testing & diagnostic and engine overhauling. Once Construction Equipment Service Technicians learn the foundations for the equipment, they receive advanced trainings in drive train repair and complete a diesel internship.

Electric Power Generation (EPG)/Marine Engine Service Technician

Electric Power Generation (EPG)/Marine Engine Technician rely on their training and experience to remove, install, overhaul and repair engines, generators, switchgear and engine components. EPG/Marine Service Technician receive training in basic and advanced courses in electrical, hydraulic, and fuel systems. In addition, they focus on Caterpillar engines that power the equipment. The student completes courses in preventative maintenance, engine testing

& diagnostic and engine overhauling. Once EPG/Marine Service Technicians learn the foundations for the equipment, they take advanced electronic courses such as Ladder Logic & Control, AC Circuits 1, Electric Power Generation and a diesel internship.

FABTECH PROGRAM ADVANTAGES

- Low cost (tuition substantially less than traditional 2 year programs)
- Caterpillar specific service technician career tracks
- Hands-on learning in a new state-of-the-art facility
- Opportunity to train on Caterpillar equipment
- Affordable dormitory housing and meal program options

- Uniforms, tools and course materials included
- Experienced FVTC instructors supplemented with expert Fabick Cat technical trainers
- Opportunity to be on-the-job and earning an income in less than 12 months
- Financial aid options for students who qualify.

STUDENT LIFE

FABTECH students get a true college campus experience by taking advantage of an arrangement through nearby University of Wisconsin – Oshkosh where students have access to affordable dormitory housing at the Gruenhagen Center and meal programs at Blackhawk Commons. FABTECH students also have access to all of FVTC campus activities, clubs and events
